**Subject:** Crim rule 4.11

I, too, support the adoption of this rule. Recording an interview will save hours of time spent writing notes, or expense of court reporters or depositions in cases where a detailed record is necessary. It also encourages accuracy and furthers the integrity of the process. A recorded interview allows the witness the opportunity to refresh their recollection rather than leaving them at a disadvantage where they are the only ones who have no record of what they have said before.
